PROFESSIONAL SUMMARY

Junior Full-Stack Developer trained across four complete stacks at Axsos Academy — JavaScript, Python, Java, and MERN. Built HerjaHub, a multi-vendor e-commerce platform for Palestinian artisans, owning the front-end design, the customer-facing module, and AWS deployment. Comfortable working from relational database design through to responsive user interfaces, and experienced in Git-based team workflows. Seeking a junior developer role where I can contribute to real products and keep growing.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Django, Flask, React, Node.js, Express.js, JSP

Databases: MySQL, MongoDB

Tools & Practices: Git, GitHub, AWS EC2, Apache Tomcat, IntelliJ IDEA, MySQL Workbench, MVC architecture, REST APIs, Agile teamwork

PROJECTS

HerjaHub — Multi-Vendor E-Commerce Platform for Palestinian Artisans

Team Project | Java, JSP, CSS, MySQL, AWS EC2 | github.com/Aws1811/HerjaHub

A marketplace addressing a real local problem: Palestinian artisans lack the online visibility needed to reach buyers. The platform lets an artisan open a storefront, list handmade products, and sell directly to customers.

- Designed and implemented the platform's complete front-end interface using JSP and hand-written CSS, without relying on any UI framework.
- Developed the full customer-facing module end to end — product catalogue, store directory, product search, shopping cart, order history, and profile management.
- Implemented role-based access control separating customer and store-owner permissions, with registration, login, and custom 401 / 403 / 404 pages replacing raw server errors.
- Integrated an AI assistant enabling customers to find products through natural-language search rather than exact keyword matching.
- Acted as repository owner for the team: established the GitHub branching workflow, reviewed incoming branches, and resolved merge conflicts.
- Deployed the application to an AWS EC2 instance running Apache Tomcat.

EDUCATION & TRAINING

Axsos Academy — Full-Stack Development Program

Ramallah, Palestine | [START DATE] – [END DATE]

Intensive full-stack program covering four production stacks, with continuous problem-solving practice and technical interview preparation.

- **Four production stacks:** HTML / CSS / JavaScript • Python (Flask, Django) • Java (Spring Boot) • MERN (MongoDB, Express, React, Node.js).
- Continuous training in data structures, algorithms, and competitive problem solving, plus technical interview preparation and mock interviews.
- Certificate of completion expected [MONTH YEAR].

ADDITIONAL EXPERIENCE

Retail Associate — [STORE NAME], Ramallah | *Part-time, [YEARS]*

- Handled daily customer service, product inquiries, and point-of-sale transactions, while balancing shift work alongside full-time technical study.

Sales Associate — [STORE NAME], Ramallah | *Part-time, [YEARS]*

- Advised customers on product selection and resolved complaints, building direct communication skills with a wide range of people.

LANGUAGES

Arabic: Native proficiency | **English:** Professional working proficiency
